📍 Chennai, Tamilnadu, India

SUMMARY

Computer Science graduate skilled in Python, Machine Learning, and Deep Learning, with a focus on solving real-world problems. Passionate about using data-driven insights to build innovative AI solutions.

EDUCATION

B.E – Computer Science and Engineering, M.A.M College of Engineering & Technology,
Anna University — 2025

CGPA: 8.27

Higher Secondary School, Bishop Heber Hr. Sec. School, Trichy — 2021

Percentage: 79%

Secondary School, Bishop Heber Hr. Sec. School, Trichy — 2019

Percentage: 71%

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **ML & AI:** Supervised & Unsupervised Learning, Deep Learning (ANN, CNN, RNN – LSTM), NLP
- **Computer Vision:** OpenCV, YOLO
- **Libraries:** Scikit-learn, TensorFlow, Keras
- **Tools & IDEs:** Jupyter Notebook, Visual Studio Code, Git, GitHub
- **Databases:** MySQL

INTERNSHIP

Data Science Intern

EXPOSYS Data Labs — June 2023 – July 2023

- Worked on a Customer Segmentation project to analyze customer patterns.
- Developed targeted marketing strategies to improve customer engagement.
- Applied data science techniques for effective data analysis.
- Enhanced business efficiency by identifying distinct customer segments.

Front-End Developer Intern

CodeBind Technologies — July 2024 – August 2024

- Developed responsive web interfaces using HTML and CSS.
- Improved user experience with clean and efficient design.
- Fixed front-end bugs and ensured cross-browser compatibility.
- Enhanced website performance through efficient front-end development.

PROJECT

Employee Attrition Prediction

- Built a machine learning classification model to predict employee attrition using HR data.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering to identify key attrition factors.
- Tech used: Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook

AI-Powered Banking Exam Preparation System

- Developed an AI-based banking exam preparation platform with support for Prelims & Mains mock tests, sectional tests, and topic-wise practice using Python, Streamlit, and JSON-based datasets.
- Integrated RAG-based AI Tutor (LLM + prompt engineering) to generate exam-level MCQs, evaluate answers, and provide step-by-step explanations.
- Designed a real-time mock test engine with sectional timing, negative marking, performance analytics, and dynamic question generation for multiple banking roles (IBPS, SBI, RBI, NABARD, etc.).

ACHIEVEMENTS AND CERTIFICATIONS

- Won first prize in a non-technical event and actively participated in a paper presentation on "Speech Recognition" at Kongu Nadu Engineering College.
- Completed Cyber Security and Foundations for AI, ML, FS online courses from Naan Mudhalvan.
- Completed Data Science Certification – Softlogic System (2025).
- IBM Certification: Python for Data Science.
